

uplink[®] REMOTE

Remote Interactive Service App

Control The Alarm System From a Smartphone or Tablet

Today's busy lifestyles demand the ability to control an alarm system remotely via an application that can operate on any smartphone or tablet. Uplink Remote gives users that freedom, allowing them to control the system remotely and receive important alerts and information.

With Uplink Remote you can:

View the system's current arming status

Remotely arm and disarm with virtually any system

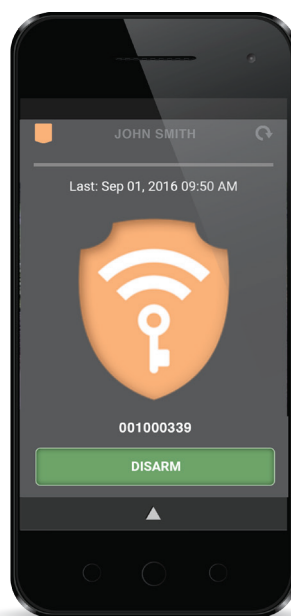

View alarm event history

Receive event notification messages

Add, manage, and delete users

Adjust settings for event notifications

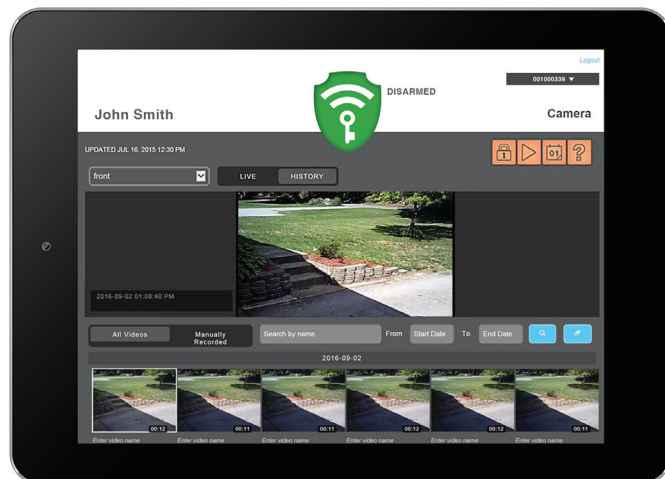

Access live video footage of your home or business

Arm/Disarm

Event History

Live Video & Video History
