

## Technology Upgrade Program

### 2G Worries Got You Down? Uplink Has a Solution!

Solve your 2G problems AND upgrade your existing communicators with Uplink's Technology Upgrade Program. This program provides a free cellular communicator when you replace multiple 2G units with newer technology Uplink communicators before December 31, 2016.

#### Here's how it works:

1. Purchase Uplink communicators from your preferred Uplink distributor.
2. Replace your 2G communicators with the new Uplink communicators.
3. Activate the units on the Uplink plan of your choice, including Uplink Remote if desired.
4. Download and complete the free technology upgrade order form from [uplink.com/resources/free-technology-upgrade](http://uplink.com/resources/free-technology-upgrade).
5. Attach the 2G SIMs from the units that have been replaced, and mail the form and SIMs to Uplink.

The free technology upgrade program works like this:

**Get a FREE communicator for every three, four, or five 2G units you replace with a new Uplink unit.**

**Get one free 4500EZ, CDMAEZ, 4530EX, or CDMAEX unit for three 2G units upgraded**

**Get one free 4590, 4640G, GPS HW, or GPS OBD unit for four 2G units upgraded**

**Get one free 4550 unit for five 2G units upgraded**

A \$5.00 shipping and handling charge applies

**Learn more about these new technology alarm communicators at [uplink.com](http://uplink.com)**

**Don't get caught in the dark.  
Upgrade your 2G devices TODAY!**

## Terms & Conditions

The Free Technology Upgrade Program provides a free cellular communicator to alarm companies that replace multiple 2G units with the latest Uplink communicators. This offer includes replacement of 2G alarm communicators from any cellular alarm communicator manufacturer.

Alarm companies replacing three 2G units with new Uplink units will receive a Model 4500EZ, CDMAEZ, 4530EX, or CDMAEX at no charge, dealers replacing four units will receive a Model 4640G, 4590, GPS HW, or GPS OBD, and dealers replacing five units will receive a Model 4550.

The steps and requirements of the Free Technology Upgrade Program are as follows:

1. Dealers simply remove 2G units from service and replace each with a new Uplink communicator activated on an Uplink service plan.
  - a. Dealers must buy the Uplink units from a distributor, record the serial numbers, and collect the SIMs from the deactivated 2G units.
2. Dealers will submit by mail the 2G SIMs and the serial numbers of the installed units on Uplink's upgrade submission form available on its website. On the form, dealers will select if they desire:
  - a. One free 4500EZ, CDMAEZ, 4530EX, or CDMAEX unit for **Three** 2G SIMs submitted
  - b. One free 4640G, 4590, GPS HW, or GPS OBD unit for **Four** 2G SIMs submitted
  - c. One free 4550 unit for **Five** 2G SIMs submitted
3. Uplink will ship the selected upgrade unit to the dealer at no charge except for a \$5.00 shipping and handling fee.
4. Dealers may then install and activate the free upgrade unit on the desired service plan, including Signaling only, Standard Uplink Remote, or Advanced Uplink Remote. The free upgrade unit serial number may not be used for a qualifying activation required in 1. above.

This offer ends on December 31, 2016, or upon notice from Uplink. The Free Technology Upgrade Program units may include LTE, CDMA or other units with advanced cellular technology that will operate in areas where 2G service has been discontinued.

This is a limited-time promotional offering. Program terms and conditions subject to change. All terms and conditions of the Uplink Activation and Service Agreement apply.
